6.	Two wooden watchtowers, about three or four meters high, makined by two soldiers armed with rifles, were located between the town and the harbor. Each watchtower was equipped with a searchlight on an open platform.	
7.[	a 7,381 CRT steam tanker, loaded its cargo in 48 hours at an hourly average of 150 tons. The oil was pumped aboard through four filling connections. A Soviet tanker, which had six filling connections, loaded its cargo in ten hours.	25X1
8.	Shore leave was granted until 2300 hours. The town looked clean, but only a few persons were seen on the streets. Every fourth person was a soldier. All the soldiers had closely cropped hair and wore clive-green uniforms with red-bordered epaulets. Some also had blue-bordered epaulets. The liberty passes were checked twice by two soldiers with green cap ribbons; they were checked at the ship and again on entering the town. Cigarettes, beer, and vodks were available in Batumi. The shops displayed clothes, canned food, and curpd and salted fish. The town was poorly illuminated in contrast to the harbor. Almost no passenger cars or trucks were seen in the town.
